MI TILE INSTALLATION EXPERTS

Decorative finish planning checklist

Keep it with your project. Share it with your contractor.

- [ ] Describe the room, lighting, cleaning needs and the amount of texture you enjoy.
- [ ] Shortlist two or three directions rather than selecting from photographs alone.
- [ ] Inspect the existing coating, moisture, cracks, adhesion and substrate condition.
- [ ] Define repairs, primer, build-up coats and protective finish as a compatible system.
- [ ] Approve a physical sample in the actual light: color, sheen, texture and variation.
- [ ] For splash or wet exposure, confirm the specific product system is approved for that use.
- [ ] Agree transitions, corners, baseboards, outlets and areas that stay untouched.
- [ ] Define a separate scope for relief, gilding, cabinetry or furniture restoration.
- [ ] Confirm room access, protection, ventilation, drying time and return to use.
- [ ] Keep the approved sample, care instructions and touch-up plan with the project records.
