MI TILE INSTALLATION EXPERTS

Kitchen remodel planning checklist

Keep it with your project. Share it with your contractor.

- [ ] Start with the daily problem: storage, lighting, work flow, appliance fit or worn surfaces.
- [ ] Confirm cabinet drawings, finished levels, appliance specifications and door clearances.
- [ ] Coordinate utilities and required inspections before closing walls or setting cabinets.
- [ ] Agree countertop templating, support, sink cutouts and the installation sequence.
- [ ] Confirm floor preparation, finished height and transitions before choosing the final flooring.
- [ ] Check tile SKU, shade, caliber, batch quantity and quality before committing to the order.
- [ ] Review backsplash layout, exposed edges, outlet support and flexible countertop joints.
- [ ] Confirm any ceramic trim or outlet-handling allowance without duplicating other trade charges.
- [ ] Approve finish samples in the room and assign responsibility for every purchase.
- [ ] Plan a temporary kitchen, protection, delivery dates and written change approvals.
